Why choose HostFileMaker?

Experience

- We have over 10 years of FileMaker hosting experience, and a well established FileMaker customer base

Expertise

- We have been a FileMaker Partner since 2005 and are accredited as a FileMaker Business Alliance Platinum Partner

Reliability

- We guarantee 99.99% availability of our hosting service

Robust Security

- Our tier three data centre facilities, located in the Thames Valley, are accredited to ISO 27001 standards

Unsurpassed Support

- We offer 24x7 dedicated support with staff experienced and trained to manage the most complex of hosting environments

Cost-Effective

- All of our solutions are competitively priced

“Our experience of HostFileMaker from RapidHost has been fantastic! Good job, good service and good advice. We have been really impressed with the reliability, security and speed of the HostFileMaker hosting and cannot fault it.”

**Geoff Stephens, Director
TimeHarvest**

HostFileMaker Features

- Access to a hosted FileMaker Server
- Unlimited data transfer per month at 10Mbps bandwidth. More than enough for the average shared FileMaker hosting user
- Sufficient disk space for all your different business uses. From 1GB for databases, and a further 1GB for web space (5DB solution only) via regularly upgraded HP hosting servers to provide a reliable high speed service
- Fully protected power supplies. External power from unique local power station with world class UPS and high power diesel generators ensuring network stability
- Multi-layer physical security protection for servers. Fire detection and suppression, CCTV coverage and ISO computer security measures
- Full network security. High quality firewalls backed up by monitoring of suspect port activities. Positive anti-hacking systems to provide high level protection
- Hosting centre located outside major centres of risk in the UK
- Daily database back up with additional backup to external devices with off-site storage
- Full time monitoring. Positive double checking of connectivity from our network monitoring stations
- HostFileMaker servers are compatible with FileMaker Go
